HOBBIES AND INTERESTS

When I'm not coding, you'll often find me out on the disc golf course trying to improve my game - there's nothing better than being outdoors and competing against myself. I hit the gym regularly to stay fit and clear my head.

Self-taught software developer transitioning from recruitment with strong foundations in front-end and back-end technologies. Proficient in HTML, CSS, JavaScript as well as frameworks like Node.js and React.

I have experience creating personal projects such as developing a task manager app that I use day to day at work and at home. I hosted this app on GitHub to allow co-workers and friends to use the application as well as taking onboard any improvements and suggestions. This led to gaining real client feedback and experience in receiving and working on feedback and adhering to customer needs. An example of this is changing the color scheme and implementing animations to make the app more exciting to use and provide satisfaction upon completing a task.

I am always seeking to improve my skills by constantly working on new projects as well as recognised courses from Codecademy, freeCodeCamp and coding challenge websites such as Leetcode and CodeWars.

EXPERIENCE

October 2024 - Current

Restart Advisor *Ingeus*, Manchester

- Elected a digital champion by the head of IT operations at Ingeus, aiding in company-wide IT solutions and improvements, as well as within my own site.
- Worked with a caseload of 65+ participants simultaneously, ensuring that each one received personalised and effective recruitment guidance.
- Developed software tools written with HTML, CSS, and JavaScript, such as a task manager that I use to track and manage tasks in order of priority.
- Hosted large on-site programming conferences, including personally building relations with software development course providers.

August 2022 - December 2022

Telesales Agent *Virgin Media*, Manchester

- Worked with inbound callers to guide and aid them through the process of selecting their desired package.
- Using excellent sales techniques to encourage customers to opt for higher-end packages.
- Regularly exceeded targets by large margins while following compliance guidelines.
